

Much needed rain has slowed some progress, but it is a delay we will readily take. This week, crews will begin regrading the gravel roads in the district which received rain, snow or sleet. The purpose of the regrading is to help these roads maintain their shape and safety.

Tuesday, we will work on 52nd Street, south of New Hope Road, with the goal of completing the recycling portion of the work.

As the week progresses, we will continue to recycle Burk Road working east, one mile north of Geronimo.

Please pay attention to road signs and be aware of crews on the streets. Please drive carefully and thank you for your patience.
