

It has been a busy September for District 1 as we work to oil and chip a number of roads in the area. Last week, crews worked on 82nd Street and Oklahomna 36, working south for three miles.

This week, the focus early in the week is the removal of rock on Wolfe Road, from 180th Street back to the west. Once the rock is removed, the road will be primed, oiled and chipped.

Crews will also be recycling on 135th Street, between North Drive and King Road. The final area of focus will be the town of Fletcher, where crews will work to recycle five miles of road in the area.

Thank you for your continued patience on this endeavor. Please pay attention to all crews and signs in the roads.
