

Last week was a busy week for District 1 road crews. The week began with work on 135th Street, working from North Drive north for 3/4 miles. Crews also cleaned berms and began recycling in Fletcher.

This week, crews will lay a second coat and overlay to the oil and chipped areas on King Road and Wolfe Road. BY the end of the week, crews will begin the overlay and chipping in the Fletcher city limits.

Weather permitting, North Drive and 135th will be oil and chipped. If it is not done this week, it will be finished next week.
